

# Let SUMMIT Be Your 10 + 2 Solution

## ARE YOU PREPARED FOR 10+2?

The U.S. Bureau of Customs and Border Protection (CBP) has increased the documentation and information filing requirements in order to provide a tightly integrated and audited supply chain for all imports. These requirements, commonly known as "10+2", will be implemented by January 2009.

*Failure to comply with these new regulations will result in:*

- Product shipment delays
- Increased U.S. Customs inspections
- Fines and penalties up to \$10,000 per incidence due to incorrect information
- Loss of import status or C-TPAT certification due to incomplete or incorrect information
- Inability for carriers and/or OTI's to transport your cargo

## THE SUMMIT SOLUTION

Summit's experienced and dedicated staff, along with our enhanced cutting edge technology, will enable you to comply with these new government requirements, improve your supply chain efficiency and provide you and your suppliers with improved visibility.

*Summit Logistics International's forwarding network provides:*

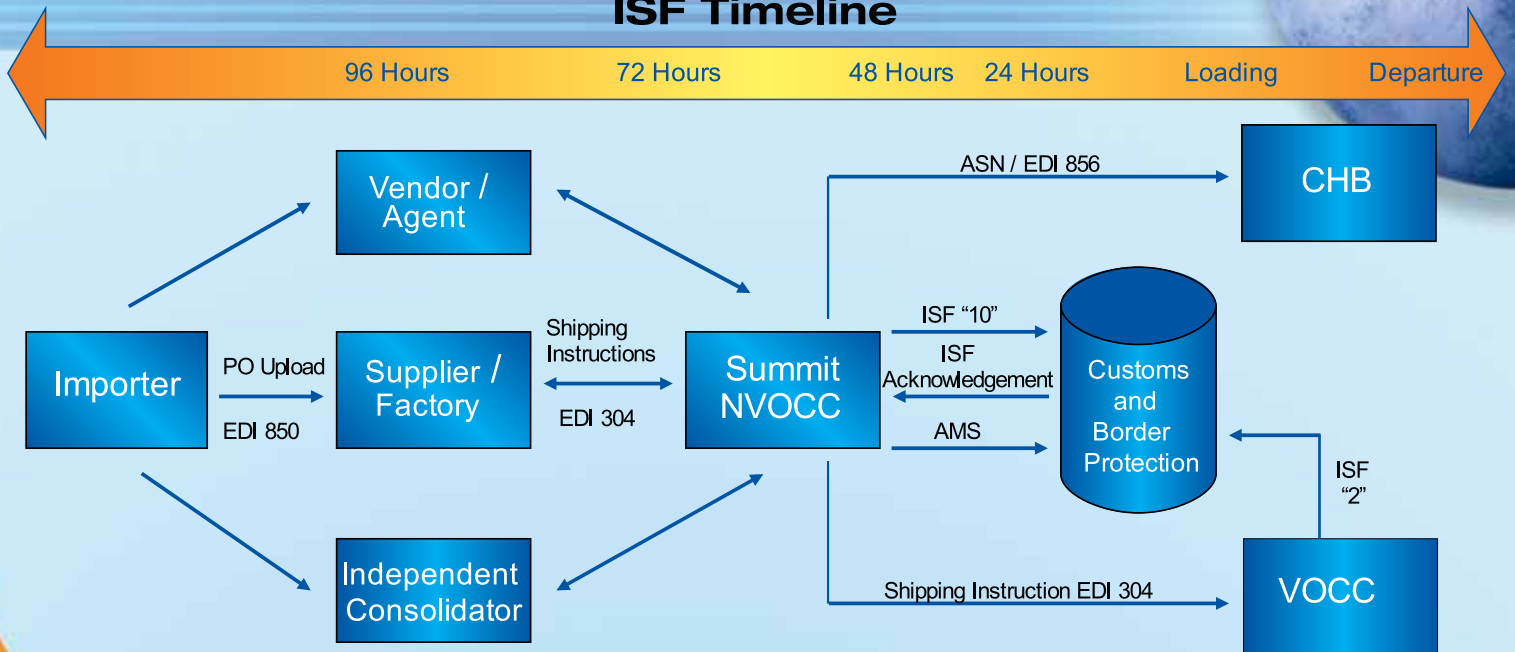

- A U.S. Customs 10+2 compliant platform
  - A fully automated and auditable system to support trade compliance and Sarbanes-Oxley requirements
  - End-to-End Visibility from initial production through final delivery
    - Supply Chain communication and compliance via our secure web-based application

**Lower Your Costs  
by reducing inventory  
with electronic real time  
integration.**

- **Shorten Time to Market by automatically creating and loading compliant standard documents in time for desired routing.**
- **Improve Supply Chain Communication and compliance with our secure web-based application.**
- **End-to-End Visibility from initial production through delivery.**

## ISF Timeline

Summit's International 10 + 2 Software solution generates **100%** of Customs required 10+2 information. Achieve efficient compliance through Summit's automation.

## PROVIDE ALL THE INFORMATION U.S. CUSTOMS REQUIRES AND MORE!

### Satisfy all Customs 10+2 requirements, plus:

- **Order Coordination and Communication** – Insure the delivery of all new and changed orders promptly and efficiently via the internet.
- **Automated Compliant Documentation** – automatically generate Customs and trade compliant inspection certificates, packing lists and commercial invoices in a standard uniform format with a single click.
- **Product Status and WIP Monitoring** – provide proactive and automated order alerts and WIP milestones.
- **Policy Communication and Coordination** – easily post shipping, quality and production guidelines to central, user-maintained web repositories.
- **Automated Alerting and Exceptions** – monitor all phases of the supply chain on an exception basis.
- **Automatically generates all of the Customs Required 10+2 information and documentation.**
